

# **PHILIPS TECHNICAL REVIEW**

VOLUME 23

1961/62

---

## P H I L I P S   T E C H N I C A L   R E V I E W

A publication of the Research Laboratories of N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Twelve issues per year and an average of 32 pages per issue. The Review is published in four editions: English, Dutch, French and German, all identical in contents.

### **Editors**

S. Gradstein, Editor-in-chief  
D. M. Duinker, Deputy editor  
M. Beun  
D. van Dalen  
E. Fischmann  
K. R. Fröhner (German edition)  
C. M. Hargreaves (English edition)  
J. W. Miltenburg

All rights reserved by N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Articles may be reproduced in whole or in part, provided that the editors are first notified and that the source "Philips Technical Review" is mentioned in full. Photographs and drawings for this purpose are available on request.

## SUBJECT INDEX, VOLUME 23, 1961/62

	Page		Page
Analogue computer for determining the colour point of a light source . . . . .	118	Neutron tube for generating 14 MeV neutrons	325
Analogue computer and resistance network for plotting electron trajectories . . . . .	352	Noise sources, standard — . . . . .	293
Balance of nature . . . . .	101	Omegatron, analysis of residual gases with —	122
Beamed light sources, automatically recording isocandela diagrams of — . . . . .	278	Opto-electronics . . . . .	189
Carbon-arc image furnace, zone melting of oxides in — . . . . .	161	Orthocyclic method of coil winding . . . . .	365
Coil winding, orthocyclic method of — . . . . .	365	Oxides, zone melting of — . . . . .	161
Colour point of a light source, determination with analogue computer . . . . .	118	Oxide-coated cathodes with half-watt heater	22
Colour TV, fluorescent screen in direct-viewing tubes for — . . . . .	133	Oxide-coated cathodes for loads of 1 to 2 A/cm <sup>2</sup> (storage oxide cathode, double-coated cathode) . . . . .	19
Computer, analogue — and resistance network for plotting electron trajectories . . . . .	352	PASCAL, fast digital electronic computer . . . . .	1
Computer, fast digital — PASCAL . . . . .	1	Photometer for testing incandescent lamps, automatic digital — . . . . .	244
<b>Control theory:</b>		Photorectifying layer for a reading matrix . . . . .	310
linear control systems . . . . .	109	Picture tubes, fluorescent screen in direct-viewing — for colour TV . . . . .	133
loop gain and stability . . . . .	151	Picture tubes, analysis of residual gases in — with the omegatron . . . . .	122
influence of non-linear recording instrument	167	“Posyn” wire, “Potermo” wire, “Povin” wire	342
Converters (DC/AC) using silicon controlled rectifiers for fluorescent lighting . . . . .	272	Projection topographs of dislocations . . . . .	82
Cyclotron, 160 MeV synchro — at Orsay . . . . .	381	Radiation furnaces of past centuries . . . . .	182
Difference amplifiers, I, II . . . . .	{ 142 173	Radiography installation, 4 MeV industrial —	197
Dislocations, projection topographs of — . . . . .	82	Reading matrix with photorectifying layer . . . . .	310
Dispenser cathodes for magnetrons . . . . .	316	Recorded velocities, optical measurement of — on stereophonic test records . . . . .	89
Dosemeters for X-radiation . . . . .	55	Residual gases, analysis with omegatron . . . . .	122
Electret with photoconductor . . . . .	310	Resistance network and analogue computer for plotting electron trajectories . . . . .	352
Electron trajectories, method for plotting —	352	Screened room, electrically — for microwave experiments . . . . .	155
Electronics in the wood industry . . . . .	29	Silicon controlled rectifiers, converters using — for fluorescent lighting . . . . .	272
Enamelled wire, manufacture and testing . . . . .	342	Snow separator for liquid-air installations . . . . .	48
Fizeau fringes observed with an interference mirror . . . . .	380	Sodium lamps, recent improvements . . . . .	246
Fluorescent screen in direct-viewing tubes for colour TV . . . . .	133	Standard noise sources . . . . .	293
High-tension generator of very small dimensions . . . . .	338	Stereophonic test records, optical measurement of recorded velocities on — . . . . .	89
Industrial radiography installation for 4 MeV	197	Stereophoto of dislocations . . . . .	86
Iodine incandescent lamps . . . . .	{ 237 242	Structure analysis by neutron diffraction . . . . .	69
Isocandela diagrams of beamed light sources, automatic recording of — . . . . .	278	Synchrocyclotron (160 MeV) at Orsay . . . . .	381
Lamp factory, birth of a — in 1891 . . . . .	222	Television, fluorescent screen in direct-viewing tubes for colour — . . . . .	133
Magnetrons with dispenser cathodes . . . . .	316	“Thermoplac” wire . . . . .	371
Microwave experiments, electrically screened room for — . . . . .	155	Traffic routes, lighting of — . . . . .	258
Neutron diffraction . . . . .	69	Wood industry, electronics in the — . . . . .	29
		X-ray dosemeters . . . . .	55
		X-ray installation, 4 MeV industrial — . . . . .	197
		Zone melting of oxides in a carbon-arc image furnace . . . . .	161

## AUTHOR INDEX, VOLUME 23, 1961/62

Articles marked with an asterisk \* are short communications.

	Page		Page
<b>Alink, R. J. H., H. J. Pel and B. W. Speekman</b> Manufacture and testing of enamelled wire . . . . .	342	<b>Laan, C. J. M. van der and K. Roozendaal</b> A snow separator for liquid-air installations . . . . .	48
<b>Almer, F. H. R. and A. Kuiper</b> New developments in oxide-coated cathodes, II. An oxide-coated cathode with a half-watt heater for cathode-ray tubes . . . . .	22	<b>Lemmens, H. J. and P. Zalm</b> New developments in oxide-coated cathodes, I. Oxide-coated cathodes for loads of 1 to 2 A/cm <sup>2</sup> . . . . .	19
<b>Bähler, W.</b> An instrument for automatically recording isocandela diagrams of beamed light sources . . . . .	278	<b>Lenders, W. L. L.</b> The orthocyclic method of coil winding . . . . .	365
<b>Balder, J. J.</b> Iodine incandescent lamps, II. Possible applications . . . . .	242	<b>Loos, C. H.</b> Influence of the non-linear behaviour of a recording instrument on the properties of a control system . . . . .	167
<b>Bastiaans, C. R. and J. van der Steen</b> Optical measurement of recorded velocities on stereo- phonic test records . . . . .	89	<b>Nienhuis, K. and O. Refenschweiler</b> The neutron tube, a simple and compact neutron source . . . . .	325
<b>Bathelt, R. R. and G. A. W. Vermeulen</b> An experimental fluorescent screen in direct-viewing tubes for colour television . . . . .	133	<b>Nijenhuis, W.</b> The PASCAL, a fast digital electronic computer for the Philips Computing Centre . . . . .	1
<b>Beer, A. J. F. de</b> * An electrically screened room for microwave experi- ments . . . . .	155	<b>Pel, H. J., R. J. H. Alink and B. W. Speekman</b> Manufacture and testing of enamelled wire . . . . .	342
—, H. Groendijk and J. L. Verster The plotting of electron trajectories with the aid of a resistance network and an analogue computer . . . . .	352	<b>Reifenschweiler, O. and K. Nienhuis</b> The neutron tube, a simple and compact neutron source . . . . .	325
<b>Boer, J. B. de</b> Lighting of traffic routes . . . . .	258	<b>Reinsma, K. and J. Hesselink</b> Dosimeters for X-radiation . . . . .	55
<b>Brekoo, H. P. J. and A. Verhoeff</b> * An experimental high-tension generator of very small dimensions . . . . .	338	<b>Roozendaal, K. and C. J. M. van der Laan</b> A snow separator for liquid-air installations . . . . .	48
<b>Chippendale, T. R.</b> A 4 MeV industrial radiography installation . . . . .	197	<b>Rydahl, A., M. Hammar and B. Westerlund</b> Electronics in the wood industry . . . . .	29
<b>Couwenberg, H. J. M. and C. Kooy</b> Zone melting of oxides in a carbon-arc image furnace . . . . .	161	<b>Santen, J. G. van and G. Diemer</b> A photorectifying layer for a reading matrix . . . . .	310
<b>Diemer, G.</b> Opto-electronics . . . . .	189	<b>Speekman, B. W., R. J. H. Alink and H. J. Pel</b> Manufacture and testing of enamelled wire . . . . .	342
— and J. G. van Santen A photorectifying layer for a reading matrix . . . . .	310	<b>Steen, J. van der and C. R. Bastiaans</b> Optical measurement of recorded velocities on stereo- phonic test records . . . . .	89
<b>Espersen, G. A.</b> Dispenser cathodes for magnetrons . . . . .	316	<b>Tijen, J. W. van</b> Iodine incandescent lamps, I. Principle . . . . .	237
<b>Francken, J. C. and J. van der Waal</b> Analysis of residual gases in television picture tubes with the aid of the omegatron . . . . .	122	<b>Tol, M. van</b> The application of control theory to linear control systems . . . . .	109
<b>Goedkoop, J. A.</b> Neutron diffraction . . . . .	69	Loop gain and stability of simple control systems . . . . .	151
<b>Gradstein, S.</b> * Radiation furnaces of past centuries . . . . .	182	<b>Veen, R. van der</b> The balance of nature . . . . .	101
<b>Groendijk, H., A. J. F. de Beer and J. L. Verster</b> The plotting of electron trajectories with the aid of a resistance network and an analogue computer . . . . .	352	<b>Verhoeff, A. and H. P. J. Brekoo</b> * An experimental high-tension generator of very small dimensions . . . . .	338
<b>Halbertsma, N. A.</b> The birth of a lamp factory in 1891 . . . . .	222	<b>Vermeulen, G. A. W. and R. R. Bathelt</b> An experimental fluorescent screen in direct-viewing tubes for colour television . . . . .	133
<b>Hammar, M., A. Rydahl and B. Westerlund</b> Electronics in the wood industry . . . . .	29	<b>Verster, J. L., A. J. F. de Beer and H. Groendijk</b> The plotting of electron trajectories with the aid of a resistance network and an analogue computer . . . . .	352
<b>Hart, P. A. H.</b> Standard noise sources . . . . .	293	<b>Verster, N. F. and G. T. de Kruiff</b> The Orsay 160 MeV synchrocyclotron with beam-extrac- tion system . . . . .	381
<b>Hesselink, J. and K. Reinsma</b> Dosimeters for X-radiation . . . . .	55	<b>Waal, B. van der</b> A simple analogue computer for determining the colour point of a light source . . . . .	118
<b>Jenkinson, A. E.</b> Projection topographs of dislocations . . . . .	82	<b>Waal, J. van der and J. C. Francken</b> Analysis of residual gases in television picture tubes with the aid of the omegatron . . . . .	122
<b>Klein, G. and J. J. Zaalberg van Zelst</b> Circuits for difference amplifiers, I, II . . . . .	142 173	<b>Weijer, M. H. A. van de</b> Recent improvements in sodium lamps . . . . .	246
<b>Kooy, C. and H. J. M. Couwenberg</b> Zone melting of oxides in a carbon-arc image furnace . . . . .	161	<b>Westerlund, B., M. Hammar and A. Rydahl</b> Electronics in the wood industry . . . . .	29
<b>Kruiff, G. T. de and N. F. Verster</b> The Orsay 160 MeV synchrocyclotron with beam-extrac- tion system . . . . .	381	<b>Wilting, J. J.</b> DC/AC converters using silicon controlled rectifiers for fluorescent lighting . . . . .	272
<b>Kuiper, A. and F. H. R. Almer</b> New developments in oxide-coated cathodes, II. An oxide-coated cathode with a half-watt heater for cathode-ray tubes . . . . .	22	<b>Zaalberg van Zelst, J. J. and G. Klein</b> Circuits for difference amplifiers, I, II . . . . .	142 173
		<b>Zalm, P. and H. J. Lemmens</b> New developments in oxide-coated cathodes, I. Oxide-coated cathodes for loads of 1 to 2 A/cm <sup>2</sup> . . . . .	19
